

No. 5802MN

SUPERVISED MINIATURE TRANSMITTER

INSTALLATION INSTRUCTIONS

The No. 5802MN is a wireless transmitter that may be worn on a belt (belt holder supplied) or around the neck (necklace not supplied). Pressing the button on the transmitter sends a signal to the control receiver. The 5802MN is intended for use only with wireless alarm systems that support 5800 series devices.

The transmitter is supervised, i.e. every hour it automatically sends a message to the control receiver that includes battery status information.

This transmitter can be programmed as any zone type response (e.g., Emergency Panics, Relay Action, etc.).

Battery Replacement

The 5802MN is powered by a long-life Lithium battery that may be replaced when a low battery is eventually indicated by the control unit.

NOTE: Although 5802MN is water-resistant, please do not submerge.

Programming the Serial Number

The 5802MN has a unique identification code (serial number) permanently assigned during manufacture.

The control system must "learn" the transmitter's serial number during installation of the system. The 5802MN response may be learned as input type "RF" (Supervised RF, for an hourly check-in; **do not** take out of range) or "UR" (Unsupervised RF). See the control unit's Installation Instructions for further details regarding programming.

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) must accept any interference received, including interference that may cause undesired operation.

FCC ID: CFS8DL5802MN

SPECIFICATIONS

Unit Dimensions:

2.4" (61mm) x 1.5" (38mm) x 0.5" (12.7mm)

LED: Lights when unit transmits.

Battery:

Duracell DL2032 or
Panasonic/Renata/
Sanyo CR2032
Battery access is via
a **quarter turn** (use a
nickel to open case back).
Excessive turning may
result in damaging the
cover.

Note battery polarity:
+POS end must face up!
(visible when installed)

REFER TO THE INSTALLATION INSTRUCTIONS FOR THE RECEIVER/CONTROL WITH WHICH THIS DEVICE IS USED FOR WARRANTY INFORMATION, AND FOR DETAILS REGARDING THE LIMITATIONS OF THE ENTIRE ALARM SYSTEM.
